Member organizations of WFDY**

Dear Comrades !

We are writing to you in connection with the events that take place in these days for the past 3 months in the city-hero of Kiev and throughout Ukraine. 22 years later the Soviet Union collapsed the power has been in capitalist hands.

During this time, formed two big capitalist clans, which came to power and robbed people, destroyed science, industry, almost completely eliminated the Soviet social rights for everyone - free healthcare, education, the workplace and guaranteed affordable housing.

During this time, Ukraine has evolved from a developed country, country - winner, the country, which became a co-founder of the UN to the poverty-stricken country with extinct population.

The period when the power has capital is characterized not only by economic expansion, destruction of social security, high corruption and lawlessness, but the most important thing - is anti-communism, which is expressed in the distortion of the history of the Soviet period , the persecution of communists and members of Komsomol.

Capital had nurtured and brought to light neo-Nazism. This inhumane ideology today are professing by dozens of right-wing organizations. The most influential of them - "Freedom" party, which held in the Ukrainian parliament in last elections.

All that is happening today in Kiev - is a struggle between two oligarchic clans for the presidency in 2015.

Many media outlets in Europe are trying to present it as a struggle of the Ukrainian people, but in fact it is false.

First oligarchic clan is westernized clan, professing the values of imperialism and foreign capital represented parties "Svoboda (Freedom)", "UDAR" and "Ob'jednana opozitsija (United Opposition)", the other - the clan of national oligarchs.

As a result of open confrontation, during provocations that had place in Kiev already had appeared the victims.

Using the failure of the authorities in many regions, right-wing extremists begin to occupy state buildings and form alternative power.

One of the first decisions of the self-styled government was the decision to ban the Communist Party.

Across the country, they are destroying monuments of Lenin and other revolutionary and Soviet leaders.

Ambassador of U.S. in Ukraine is ignoring all rules and norms of diplomacy, openly interfering in the internal affairs of Ukraine and became a supporter of one of the parties.

Europe does the same, sending emissaries to Ukraine every day, whose main task is provoke destabilization in the country and bring to power profitable government and the president for EU.

They don't regret any money or information support for it. Thanks to this situation in Ukraine today really gains strength neo-Nazism and anti-communism.

In the war between the two clans is suffering the entire Ukrainian people. We want to tell you that the Communists and Komsomol of Ukraine will not give up. In many regions of the country we are initiating the formation of the Popular Resistance groups urge anyone who subscribes to the principles of anti-fascism, solidarity and social justice join in teams and ,if necessary, they will defend themselves, their families and cities.

But at the same time your support is very important for us. We will be very grateful and thankful, if you can make the appropriate application on behalf of your organization on the basis of this letter, explain to the public in your countries, as indeed is the case in Ukraine, and that represents this "revolution"; and, if it is possible, carry out actions of solidarity with the Ukrainian people, and strongly protest against Western intervention in the internal affairs of Ukraine and support the activities of neo-Nazi organizations; to publish in your mass media information about real situation in Ukraine.

Any form of your support is very important.

Also you can ask for more information.

With sincere hope for cooperation,

**The Central Committee
Komsomol of Ukraine
City-Hero of Kiev.**
