

**Everyone is talking about war -
it's a war against YOU, worker, student, apprentice!
Down with the war! Down with inflation!**

Start now – at school, at the workplace, on the street!

1.

Enough with the fairy tales of a “just war” -
Every further weapon sent to Ukraine only worsens the genocide!
When the peoples speak with each other and free themselves – only then could there be a
just war!

Our answer to every teacher, who would speak of a “just war:”
Enough with the warmongering!

2.

Enough with school access for the military and the police -
The state apparatus regularly increases its presence among the youth
Because the state needs us for its war program!
We deny entrance into our classrooms to anyone in uniform and answer:

This time, stop the Bundeswehr BEFORE Stalingrad!

3.

Enough with the several 100 billions for the billionaires and the war -
Every further Euro sent to the exploiter class worsens inflation, brings us closer to
homelessness and starvation.

Instead, re-equipment of all schools:

Machining facilities according to the latest automation techniques!

Free cultural and common areas – available around the clock!

Free school lunch!

Free public transportation for every student, apprentice, and undergraduate!

4.

Enough with the decline of apprenticeships -
Every apprentice knows: the majority of what they learn is no longer required in
production.

And everyone sees: limited contractor positions, temporary and menial work or simply
unemployment
will become the rule.

Instead: state-guaranteed apprenticeships, up to date with the latest production methods!

**This is what we advocate for in workplaces, trade schools and
in our unions!**

5.

Onto the streets against the regime of the billionaires!

Abolish the VAT!

State price control for gas and electricity!

Rent reduction!
